FTDX9000 PERFORMANCE ENHANCEMENT PROGRAM PEP9000
UK and EUROPE only

Yaesu UK Ltd is pleased to announce that the FTDX9000 PEP Upgrade program for UK and European dealers is about to start.

We will begin the Enhancement upgrade for UK and EIRE owners of the FTDX9000 radios in January 26th 2009. European owners will be upgraded after the UK program has been completed.

Owners within the UK and Europe if not already done so should register their FTDX9000 model with Yaesu UK Ltd. Details of what information to send and where to send it are at the end of this announcement.

Owners outside the UK and Europe should contact their respective International Yaesu Dealer.

The PEP program involves upgrading the firmware in the Main CPU and DSP and replacement of a number of PCBs in the radio depending on the serial numbers of your radio.

The firmware addressed the following issues:	The following boards/items may be exchanged:
DNR... Superior SSB mode noise reduction	CNTL_UNIT TX_UNIT
DNF... Greater reduction of beat tones	RX-1 UNIT RX-2-UNIT (D/MP)
AGC... attack time fine-tuned	DSP_UNIT SCP_UNIT
Digital Filter... increased Sharp/Soft differentiation	Power Meter (Depends on model)
SSB speech processor audio augmented	
Higher Band Scope refresh rate	
Faster CAT COMMAND communication	
Activate RTTY monitor while transmitting	
CW side tone clarity	
Ringling during CW super narrow receiving	

Vertex Standard will provide all parts and labour for the FTDX9000 PEP at our expense.

DO NOT ship your radio until you are requested to do so by email or telephone from Yaesu UK. Unscheduled shipments will cause confusion and delay in returning your radio.

UK owners will be contacted directly by Yaesu UK to arrange pickup and delivery after the PEP9000 program.

European owners will be contacted either directly by Yaesu UK or by their local Dealer and asked to ship their units to the country Yaesu Dealer. Units will then be shipped to Yaesu UK for upgrade. Yaesu UK will return the units to the local dealer who will contact the owner to arrange delivery.

The manufacturer's warranty will continue from the original date of purchase (refer to your Warranty Card). In addition the Performance Enhancement parts and labour are warranted for 90 days from the return of your radio.

Any requested non-warranty repairs or damage would be made at owner's expense.

Units will be carefully scheduled to minimize any backlog or time delays at the UK Repair centre. The project will only be offered for one year and will expire December 31, 2009.

You will be able to determine that your radio has been updated by looking for the special PEP9000 label near the serial number on the back of the radio.

If your radio has this label all the updates are completed. Do not send it for updates.

Packing and packing materials are the owner's responsibility.

Care in packing and the use of proper packaging materials is critical for safe shipment and the validity of any insurance claims. Please use the original packing materials. Be sure the packaging material are not damaged and that the radio is held securely in position inside the box. The front of the radio may need additional foam, soft cushion or padding. Place the radio inside a plastic wrapping or large bag to protect the paint.

Before shipping your radio, make a written record of your customized menu settings. You may also use the CF card to save and restore the old settings into the PEP9000 updated radio, (the menu order is different but restoring is now possible with the V5.08 or higher software). Please see the new PEP9000 Menu Mode List, posted in the FTdx9000 files section. (www.yaesu.com) The Radio will be set to the factory default settings when it is returned.

To request the FTdx9000 PERFORMANCE ENHANCMENT, please send an email to: paul.bigwood@yaesu.co.uk and ensure you set the subject line to: FTDX9000 PEP Upgrade Program Request

And in your email include the following information:

1. Your name and callsign:
2. Pick up & Shipping address
3. E-mail address
4. Telephone number (include the country code if outside UK)
5. Complete FTdx9000 Model (e.g. FTDX9000D, FTDX9000Contest or FTDX9000MP)
- 6: If CONTEST type please indicate if any options are installed (e.g. 2nd RX, DMU unit etc)
6. Serial Number
- 7: Dealer and date purchased.

If you have any queries please contact paul.bigwood@yaesu.co.uk

We will provide a confirmation email and scheduled date for the radio to be upgraded.
